

I. INTRODUCTION

- 1. Overview/Background of the study**
- 2. Operational Definitions**
- 3. Need for the study**
- 4. Aim and Objectives**
 - Aim
 - Objectives
- 5. Hypothesis**
 - Null Hypothesis
 - Alternate Hypothesis

II. REVIEW OF LITERATURE

III. MATERIALS AND METHODS

- 1. Study type and Design**
- 2. Study setting/location**
- 3. Study duration**
- 4. Sample size and Justification**
- 5. Sampling technique**
- 6. Study population**
- 7. Ethics considerations**
- 8. Inclusion criteria**
- 9. Exclusion criteria**
- 10. Data collection**
- 11. Outcome measures**
- 12. Interventions (If applicable)**
- 13. Data analysis**

IV. RESULTS

V. DISCUSSION

- 1. Discussion**
- 2. Clinical and Practical Implications**
- 3. Strengths and Limitations of the Study**
- 4. Conclusion**
- 5. Summary**
